

Regusol X

The solar station “Regusol X” is for the connection of solar systems via a heat exchanger. The “Regusol X” offers all the benefits of the “Regusol EL” plus a integrated electronic control with a heat exchanger and a three-way conversion valve for second circuits, completely pre-assembled.

Regusol EL 130

The solar station “Regusol EL” consists of the integrated electronic control unit, the pump unit, as well as isolating and safety devices (safety valve, check valve, flow measuring device, fill and drain ball valve etc.).
