

Indirect Solar Water Heaters

Indirect domestic hot water solar storage tanks are made in 80- and 119-gallon units.

Models include Dual Coil (G), Single Coil (SCG), and Single Coil with Electric Back-up (SCGE), and Dual Coil with Electric Back-up (DCGE).

The bottom heat exchanger coil is connected to the solar collectors. For solar storage only, use the single coil tank (SCG). The dual coil model is designed for boiler back-up indirect water heating (DCG). The electric models (SCGE/ DCGE) provide a 240VAC element for electric back-up hot water heating.

- Available in 50*, 80, and 119 gallon capacities (single or dual coil configurations)
- Optional 4500W electric heating element (single or dual coil configurations)
- Available with single or dual high capacity 1.5" internal coil heat exchangers
- Porcelain fused-to-steel lining is highly resistant to aggressive water
- 1" NPT connections
- 2" Non-CFC zero ozone depleting foam insulation
- Two magnesium anodes
- Factory installed brass drain valve
- Factory installed T&P valve

*Single coil tank only
